Duty

Medium/Light
Duty

5151 + Lil Tipper

Walking Floor

Gemini with P-AVC-295-HP-13 Air Tower

Note:

1. To prevent cavitation, the return line hose must enter the tank below the fluid level by means of entering the bottom of the tank or by means of using a drop tube (stand pipe); if not you must use the optional low PSI check valve as pictured above. (Raising the pressure in this line may cause the bed to raise in neutral)
